EDUCATION

University of Washington | *Bachelor's of Science Degree in Computer Science* Sept 2020 – Aug 2023

- **Earned Dean's List:** Winter 2021, Spring 2023
- **Relevant Coursework:** Data Structures, Algorithms, Object-Oriented Programming, Databases, Natural Language Processing, Web and Mobile Development, Computer Architecture

RELEVANT EXPERIENCE

Coding Instructor | *Coding Mind Academy* | *Full-time* | *Hybrid* Jun 2025 – Present

- Teach fundamental programming concepts and coding best practices using Python, Java, and Scratch to K-12 students across after-school programs, weekend workshops, and trial classes.
- Lead students through the software development life cycle of coding projects, emphasizing problem-solving, creativity, and debugging from planning and implementation to the final presentation.
- Develop and design curriculum content based on student performance metrics and individualized feedback, resulting in higher student engagement and improved learning outcomes.
- Guide trial classes to engage and recruit aspiring programmers, dynamically adapting curriculum and teaching methods to individual learning styles, age groups, and skill levels.

Full-Stack Software Developer | *Cook Systems* | *Apprenticeship* | *Remote* Aug 2024 – Oct 2024

- Completed an 8-week intensive program focusing on technical skill development and specific training for enterprise-level corporate environments.
- Established a strong foundation in full-stack development through hands-on projects utilizing Java, Spring Boot, PostgreSQL, JavaScript, Angular, and React.
- Collaborated in cross-functional teams within an Agile environment, utilizing effective communication, teamwork and leadership to deliver software solutions within deadlines.

Front-end Developer | *Jiri Natural* | *Internship* | *Remote* Jun 2023 – Aug 2023

- Achieved a 60% improvement in website accessibility through innovative solutions and strategic planning for future development in collaboration with leadership.
- Refined and improved the user interface design, developing a cohesive and aesthetically pleasing user experience.
- Improved 20% in page load time and optimized website performance through implementing best practices.

PROJECTS [LINK](#)

LessonPlan | *React, TypeScript, Tailwind CSS, Google Cloud Platform, Google Gemini SDK*

- Developed an AI-powered application enabling educators to convert raw curriculum data and PDF documents into structured, classroom-ready lesson plans.
- Reduced lesson planning time by 30+ minutes per lesson plan, significantly improving educators' workflow efficiency and productivity.
- Developed a modern, educator-focused interface using Tailwind CSS and React, delivering clean, structured lesson plans and improving user experience.

Team Management App | *Java, Spring Boot, TypeScript, Angular, PostgreSQL, Postman, Maven, Node.js, Figma*

- Developed a full-stack work organization management application, allowing users to post announcements, manage teams, projects and users within their organization, complete with back-end documentation.
- Built 16+ RESTful API endpoints for user, team, company, and announcement management using modular controller-service-DTO architecture, improving code maintainability and scalability.
- Built an interactive front-end user interface with diverse functionality, featuring a role-based authentication login page, an employee directory, a homepage and additional sections for user navigation.
- Integrated functionality to bridge the back-end and front-end, featuring secure user login with a Spring Boot credentials system for authorized access to organizational data.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL, HTML/CSS, C/C++, R, Erlang

Frameworks: Spring Boot Angular, React, Node.js, JUnit, Swing, Express.js, TensorFlow, Material-UI

Developer Tools: Git, Github, PostgreSQL, Google Cloud Platform, IntelliJ, WebStorm, Android Studio, Postman

Other: Version Control, Documentation, Agile Project Management, SCRUM, Harvard CS50, Problem Solving
